About Sailspan

From Factory to Supply Chain – 15 Years of Deep Cultivation,
Just to Understand What You Need

In 2008, we were a factory.

Now, we are a supply chain.

Over the past 15 years, we've made many products and listened to countless customer voices:

"Can you help with other things besides your products?"

"I trust you – can you handle the whole set for me?"

SailSpan Supply Chain was born from real market needs.

Rooted in Yiwu's mature industrial ecosystem and supply chain management expertise, we discovered while serving clients both at home and abroad that more and more businesses urgently need a more transparent and efficient total procurement solution.

What We Can Provide

No matter where you are from or your level of experience, you can use our services if you have a budget of more than \$1,000 for a product. We offer two service plans to cover the different needs of our clients.

Hot new arrivals

Jewelry & Accessories

Beauty & Personal Care

Smart Home

Outdoor & Sports

Baby & Toys

Pet Supplies

What Makes Us Unique

Quality assurance

We place a strong emphasis on product quality.

We conduct thorough inspections of products before we ship them out. And we are one of the few sourcing companies that provide 1-by-1 product inspections, minimizing the defect rate to nearly 0

Professional sourcing team

Our company has over 200 employees, each with years of experience in China sourcing across a wide range of products. In contrast, most other sourcing agents have smaller teams of fewer than 10 people with expertise limited to specific categories.

Competitive prices

We always encourage our clients to compare our quote with those they receive from other suppliers before selecting our service plans. Over 90% of them choose our Pro Plan because we consistently offer the most competitive prices.

In-house production department

Although we are a sourcing company, we have our own production department capable of handling tasks that many factories are unable or unwilling to do. These tasks include product repackaging, bundling, e-commerce preparation, dropshipping, and fulfillment services.

Special support for growing businesses

For large-scale or rapidly expanding companies, we offer a range of tailored additional services. This includes assigning a team of up to 20 people, providing credit payment, and more.

Success Stories

01

Many e-commerce clients choose us first from all the China sourcing companies, because we can provide them with comprehensive tailor-made services. We help Amazon sellers develop custom products, help Shopify sellers fulfill their orders, and help them dropship from China.

02

Many promotional gift companies in the US and Europe have long-term cooperation with us, in order to handle a large number of daily customer inquiries. We can efficiently and smoothly help them handle quotation, sample making, production follow-up, and logistics.

03

Many supermarkets and retail store purchasing departments in various countries work with us to help them source new and best-selling products. A leading supermarket group in Morocco has made us their strategic partner for their online retail business.

04

More than 20 Amazon FBA training companies are also our long-term partners. We help their students launch business with reduced risks and accelerated growth. One of the largest Amazon aggregator companies also hired us to optimize the supply chain of some of their acquired stores.

05

We helped the Mexican government purchase a wide range of educational and office supplies. Given the broad product range educational and office supplies. Given the broad product range and multiple suppliers involved, we handle supplier selection, production timelines, and quality control.

Find Us on Social Media

We are always active on social media, sharing knowledge about sourcing, international trading, e-commerce, and more.

From our office to the market — we source where it happens.

How to Work with Us

Submit an inquiry, and our customer support team will match you with a professional agent.

01

Get a free quotation from Sailspan and compare it with any existing quotes from your own supplier.

02

We integrate all supplier resources, send you samples, and provide follow-up on production progress.

03

We conduct thorough quality inspections of your products at our warehouses and arrange logistics to your door.
